

## Parking Lot Traffic Flow

1. The safest Drop-Off/Pickup procedure is to use the circular pattern in either the WEST or EAST parking lots. Children can enter the building directly without having to cross over any traffic. (Item A & B respectfully).
2. Drivers should not park, drop off, or pick up students at the base of the main entrance ramp. (Item C). We need to keep the handicap and emergency access open.
3. Drivers should not park at the elbow section of the main entrance - this greatly obstructs vision as well as narrows the entrance/exit (Item D & E).
4. In the winter months, drivers should not park on the elbow leading to the west ramp. This ramp is ONLY wide enough for two lanes of traffic, parking in one of them creates a safety issue (Item F).
5. Handicap/Emergency parking ONLY (Item G).

**PLEASE EXERCISE EXTREME CAUTION  
COMING & GOING TO SCHOOL.**

**YOUR COOPERATION IS  
GREATLY APPRECIATED.**
